

Double Beam Multilobe Grab Bridge Crane

● Product Introduction

Comprehensive use of electro-hydraulic pressure machinery technology, strong gripping force, high degree of full automation, mainly used to process power and fine bulk materials, such as chemicals, fertilizers, grain, coal, coke, iron ore, sand, granular building materials and crushed materials Handling tools such as stone.

It has been widely used in ports, steel mills, power plants, ships and garbage treatment plants, and used with tower cranes, ship cranes, ship unloaders, crane cranes and other types of cranes.

● Basic Parameter

Capacity	8T-12.5T	Span	19.5m-31.5m
Lift Height	34m-36m	Working Class	A8
Power source	380V 50hz 3P
