NULONS

European Crane Wheel

Product Introduction

The European-style crane wheel set is the main mechanical part of the running mechanism. The European crane wheel requires the diameter of the wheel to be as small as possible, and generally adopts the bearing seat structure of the frame on the web, and the bearing seat is connected with the frame with fasteners, and the wheel pressure is relatively large, and the material strength and assembly accuracy are required to be higher.

Basic Parameter

Wheel Diameter	160-630 mm	Wheel Material	65Mn
Wheel Width	60-150 mm
