

HB Type Explosion Proof Electric Hoist

● Product Introduction

This series of products are compact in structure, light in weight, small in size, large in lifting capacity, when the plant is full of explosive mixture, under the premise of ensuring safety, it is a favorable tool to improve labor conditions and increase labor productivity, so it has become a necessary mechanical equipment in a reasonable process.

It is installed on the I-shaped steel track to lift heavy objects, and can make straight and curved reciprocating movements along the track to ensure sufficient safety. According to different use requirements, it can be used with LXB explosion-proof single-beam suspension crane or LB, LHB explosion-proof single-beam and double-girder overhead cranes.

● Basic Parameter

Lifting Weight	0.5T-16T	Hoisting Height	6m-30m
Hoisting Speed	8/0.8, 7/0.7, 3.5/0.35 m/min	Travel Speed	20 m/min
Working Class	M3	Power Supply	380V 50hz 3P
