

Hydraulic Multi-flap Grab

Product Introduction

This series grab is suitable for loading and unloading of scrap iron and steel bulk materials and garbage in various harsh environments, and is widely used in port, railway, metallurgy, mining, construction and other industries.

The grab jaw flap can be closed according to the shape and size of the material, which is conducive to the grabbing of large materials. The number of jaw flap can be designed according to the characteristics of grabbing materials and the needs of users.

Basic Parameter

Volume	0.5~20m ³	Self-weight	1.5T~11T
Motor power	11~45kw	Operating Pressure	180, 200 bar
Close Time	10~28s	Power Supply	380V 50hz 3P
