

Lifting Electromagnet for Turning and Side Hung

● Product Introduction

This lifting Electromagnet is suitable for turning slab caster for the purpose of checking & surface finishing its up and down surface and for lifting and transporting thick plate and tube caster as well, it can turn slab caster around 180° degree when being lift by the crane equipped with guide column.

● Basic Parameter

Model	MW73	Rated Voltage	DC-220V
Max. Temperature	Reach to 700°C	Duty Cycle	TD-75%
Matching Equipment	Overhead crane, gantry crane, excavator, etc	Handling Material	Metal scraps, steel billets, steel plate, wire rods, etc
