

MW22 Lifting Electromagnet for Billet, Girder Billet and Slab

● Product Introduction

MW22 series lifting electromagnet, the most widely used series whose shape is rectangle especially suitable for lifting and transporting billet, steel ingot, bloom, etc., and round, profiled steel as well. Different magnetic circuits are designed for different steels. Used in different industrial areas, such as steel making, foundry, mining, machinery, transportation and other industries.

Choose normal or high or super-high temperature type according to the material's temperature. If below 150°C choose normal type, between 150°C and 600°C high type, above 600°C but with a limit under 700°C, super-high type .

● Basic Parameter

Model	MW22	Rated Voltage	DC-220V
Lifting Capacity	On demand	Duty Cycle	TD-75%
Type	Normal temperature, high temperature, super high temperature	Handling Material	Metal scraps, steel billets, steel plate, wire rods, etc
