

MW5 Scrap Lifting Electromagnet

● Product Introduction

Suitable for cast ingot, steel ball, iron, machine chip, for various kinds of steel scraps, return scraps, cropping, baling scraps and etc in foundry factories and for iron powder in coal washery, During slag disposal process it can remove large size of iron at initial step, Outlet box has two chambers, an extra-thick fender and an anti-twist setting. There are their excitation options; rated voltage DC220V; strong excitation; over excitation.

Choose normal or high or super-high temperature type according to the material's temperature. If below 150°C choose normal type, between 150°C and 600°C high type, above 600°C but with a limit under 700°C, super-high type .

● Basic Parameter

Model	MW5	Rated Voltage	DC-220V
Max. Temperature	Reach to 700-800°C	Duty Cycle	TD-75%
Matching Equipment	Overhead crane, gantry crane, excavator, etc	Handling Material	Metal scraps, steel billets, steel plate, wire rods, etc
