

## RMG Type Upper Rotation Rail-mounted Container Gantry Crane

### ● Product Introduction

RMG Type Upper Rotation Rail-mounted Container Gantry Crane is suitable for railway freight yards, ports, open warehouses, and container transfer stations with large spans and frequent loading and unloading operations. This machine adopts a U-shaped door frame, its leg clearance is large (nearly 7m), suitable for heavy cargo and container loading and unloading operations. The machine has two types of electric conduction: sliding contact wire and cable. A sliding contact wire is preferred. The electric conduction form and position should be clear when ordering.

### ● Basic Parameter

Capacity	5~50/10t	Span	18m-35m
Lift Height	Max 16.5m	Working Class	A5
Power source	380V 50hz 3P or customized
