

CDMD Series Wire Rope Electric Hoist

● Product Introduction

Model CD, MD wire rope electric hoist is a small size lifting equipment, which can be mounted on the single beam crane, double girder, gantry crane and arm cranes. With slight modification, it can also be used as a winch. The lifting speed of CD type electric hoist is normal speed, which can meet the general use requirements. MD electric hoist has 2 lifting speeds: normal speed and slow speed. When working at slow speed, it can meet the requirements of fine operations such as precision loading and unloading, sand box clamping machine tool maintenance, etc. Therefore, the use range of MD type electric hoist is more extensive than that of CD type electric hoist.

● Basic Parameter

Product Type	CD/MD	Lifting Speed	8m/min
Lift Height	3m-30m	Lifting Capacity	0.5-30T
