

European Double Beam Gantry Crane

● Product Introduction

The European-style gantry crane is designed and manufactured according to the advanced standards of European Standard Co., Ltd. Its rated capacity is 3 ~ 20t. The lifting mechanism is a European-style electric hoist trolley. The trolley is equipped with a reducer and a three-in-one transmission.

The use of variable frequency speed regulation technology comprehensively improves the overall performance of the product. The weight of the entire machine is reduced by more than 15%, and the wheel pressure is 10 to 20%. This product can be widely used in factories, freight yards, warehouses and other places where goods are loaded and unloaded.

● Basic Features

Strong carrying capacity, suitable for large and heavy objects. It has good stability and is suitable for occasions requiring large-scale lateral movement.

1. Light weight.
2. European finite element advanced standard design.
3. Three-level drive, high work efficiency.
4. Frequency conversion speed regulation technology.

● Basic Parameter

Capacity	3T-80T	Span	18m-25m
Lift Height	10m-12m	Power source	380V 50hz 3P or customized
